

Abdul Manan

Front-end React Developer

As a motivated and dynamic Junior Front-End React Developer, I specialize in building responsive and user-friendly websites using HTML, CSS, JavaScript, and React. With expertise in problem-solving and optimizing AI queries, I am passionate about coding and thrive in collaborative team environments. Currently exploring the MERN stack for full-stack development, I am ready to take on new challenges and deliver high-quality results in innovative web development projects.

Work Experience

As a Junior Front-end React Developer, I have gained hands-on experience through coursework and projects, specializing in building websites using HTML, CSS, Bootstrap, Firebase. I have successfully completed projects using React and Firebase, and I am proficient in working with the MERN Stack (MongoDB, Express.js, React, Node.js) to develop dynamic web applications.

I recently completed a comprehensive 1-year course in web and mobile development, Where I successfully completed various assignments and projects, honing my skills and gaining practical experience in developing web and mobile applications.

Personal Projects

- Developed a responsive single-page design for a tour and travel website, showcasing destinations and trending stories to engage users.
- Created a todo task management website, empowering users to efficiently add, edit and delete tasks for improved productivity.
- Build a speech converter website that converts speech into text, providing a feature to copy the converted text for ease of use.
- Developed an event planner website, enabling users to list events, check event dates and easily book seats for event attendance.
- Created a personal portfolio website to showcase my skills, projects and achievements as a front-end React developer.

Recent Projects.

- **Rental Haven Mobile App and Website:**
Developed a responsive Rental Haven website with authentication functionality, allowing users to seamlessly rent various items such as vehicles, electronics, properties, household goods and more. Implemented advanced features like item searching, favouriting, and seamless communication between owners and renters to enhance the rental experience. Link: [rental haven website](#)
- **E-commerce Website:**
Developed a responsive e-commerce website, offering customers the ability to browse, search, add products to cart and submit reviews. Implemented authentication for secure customer access, checkout functionality for payment and contact form to facilitate communication. Link: [e-commerce website](#)
